

860D-ESD

Quick 860D-ESD – Lead Free SMD Rework Station:

- Closed loop sensor, zero triggering, micro computer controls temperature, LED display. Fast heating; Precise and stable temperature, not influenced by air volume.
- With induction switch in the handle. When the handle is picked up, the unit starts working immediately; When placed back in holder, the unit enters standby status automatically.
- Lightweight handle.
- Digital temperature calibration, easy to operate.
- Cooling air function available. It can prolong the life of heater and protect the unit.

Power Consumption	120 Watt
Temperature Range	100 - 450°C
Air Volume	From 0.8 – 6.8 L/Min.
Weight	2.6Kg
Dimensions	100(L) x 210(D) x 135(H)mm
